Chair's Message: 2021 - A Year for Creativity and Innovation

Dear Friends of The Immunization Partnership,

As you read this, Texas and the rest of the world have entered the second year of the COVID-19 pandemic, which has touched everyone. Many of us know someone who contracted the virus, while others may have family members or friends among the more than 770,000 who have died from this vaccine-preventable disease.

The pandemic affected many of our immunization programs that required in-person, onsite collaborations with public health partners, coalitions, and schools across Texas. The Immunization Partnership staff, however, remained undeterred by COVID's challenges. They developed opportunities and expanded programs to increase awareness throughout our many diverse communities regarding the increasing need to strengthen and improve our state's responses to overcome hesitancy of the many vaccines that protect us every day.

Creativity and innovation may be the TIP Phrase of the Year. Many of our usual methods of educating the community, advocating for evidence-based public policy, and supporting immunization best practices have not been feasible during the pandemic. TIP staff did an outstanding job of using creativity and innovation to develop alternatives for achieving our goals from writing and distributing a children's book, to producing animated vaccine videos, to conducting virtual workshops and classrooms, to organizing a council of experts to address health inequities in our communities of color, and to developing daily podcasts that take our messages around the world.

Our advocacy and public policy staff held hundreds of meetings with legislators and their staff at the state capitol in Austin during the 87th Texas Legislature and three special sessions. Despite restrictions on in-person visits and group attendance, TIP and our grassroots partners worked with public health officials, medical experts, and business leaders across the state to pass two pro-immunization bills and defeat every bill that would have undone decades of sound and effective public health policies.

We do not charge for our work. We rely, instead, on vital funding from corporations, foundations, and government agencies, and on the philanthropic generosity of individuals and other community partners. You, and they, make our work possible and help to make our state a safer and healthier place for all Texans today and for generations to come. Thank you for your support as we work to achieve our vision of a community protected from vaccine-preventable diseases.

Erich M. Sturgis, M.D., M.P.H.

The Immunization Partnership Board Chair FY20-21

Professor and Vice-Chair of Clinical Affairs

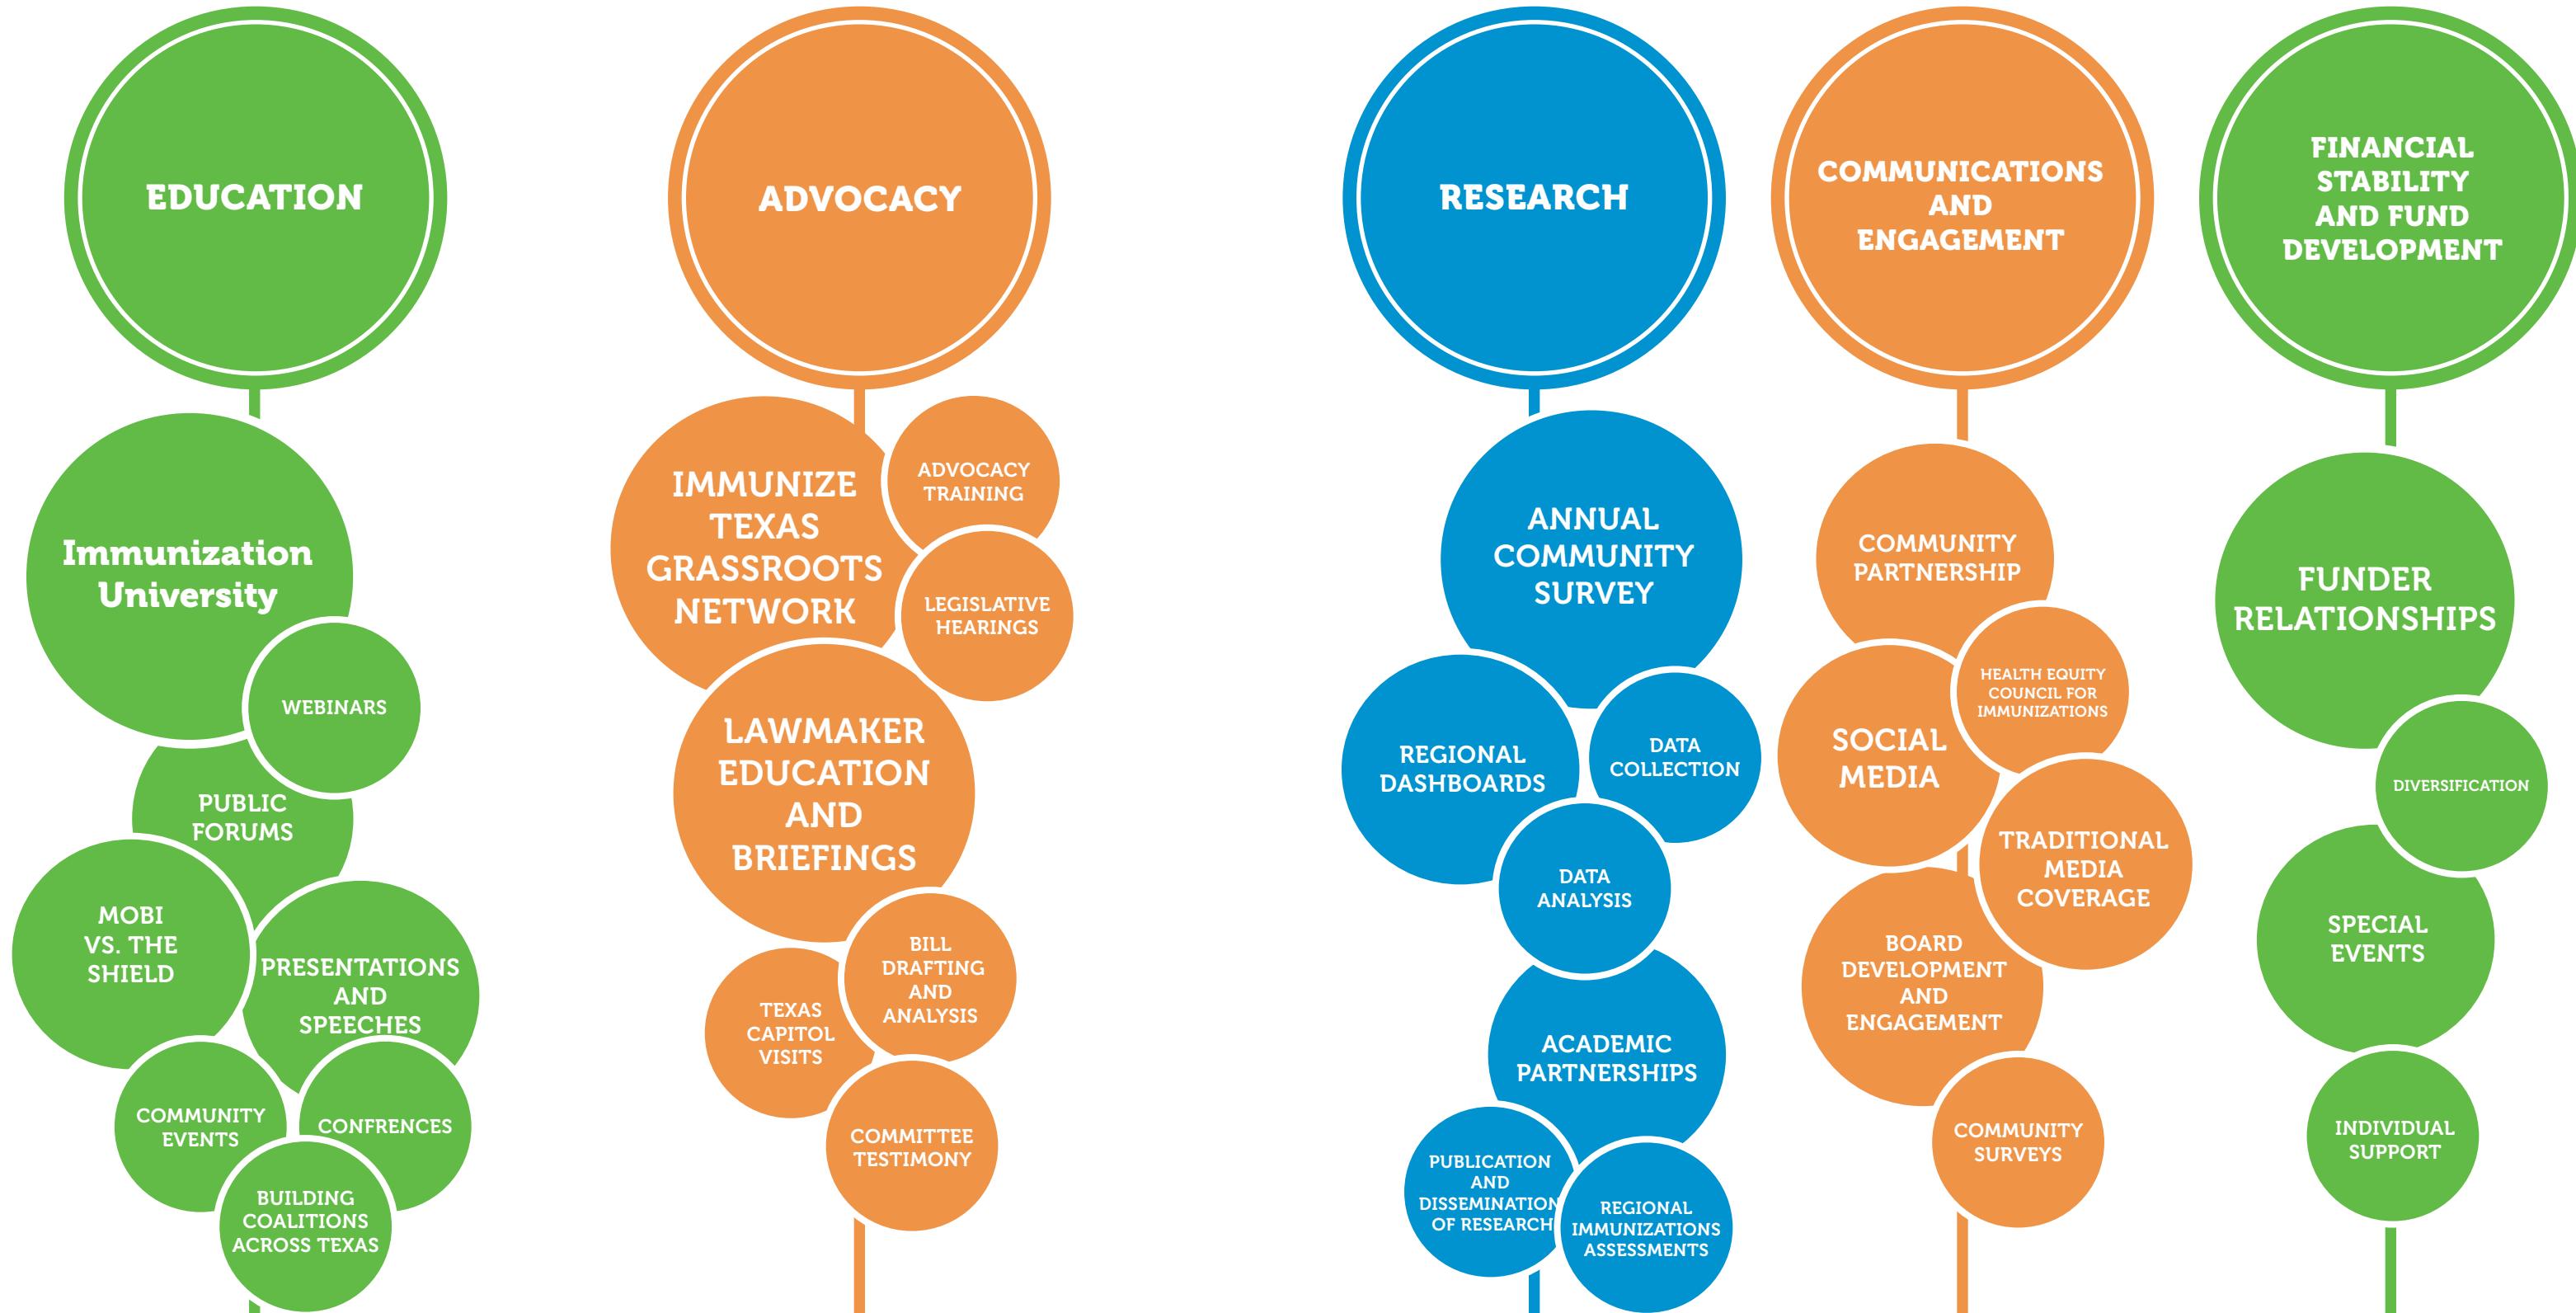

Department of Otolaryngology-Head and Neck Surgery

Baylor College of Medicine

OUR PRIORITIES

Fiscal Year 2021

COVID-19 INFORMATION

During the COVID-19 pandemic, The Immunization Partnership developed and provided information through traditional, online, and virtual methods to meet the needs of our front-line public health responders, healthcare professionals, and the public.

Pandemic Vaccine Task Force

The TIP team, along with our Pandemic Vaccine Task Force and Health Equity Council for Immunizations, held a virtual news conference to announce the completion of valuable feedback and recommendations for our local, state, and federal partners to improve distribution, allocation, and access to COVID-19 vaccines.

TIP animated videos answer COVID vaccine questions, debunk misinformation

A series of short videos—created through a unique collaboration between The Immunization Partnership and Amerigroup Texas—seeks to slow the spread of COVID-19 by increasing awareness about the vaccines that fight it. The videos in English and Spanish encourage vaccination, answer questions about the vaccine, and debunk falsehoods circulating over social media and elsewhere. Such misunderstandings and misinformation contribute to vaccine hesitancy, drive down vaccination rates, and worsen the strain on health workers and resources. Coastal Health & Wellness clinics in Galveston was the first Federally Qualified Health Center in Texas to show the videos in their reception areas.

Special COVID-19 vaccine information page on website

Our special COVID-19 webpage contains answers to many frequently asked questions about COVID vaccines, community immunity, and COVID pediatric vaccines.

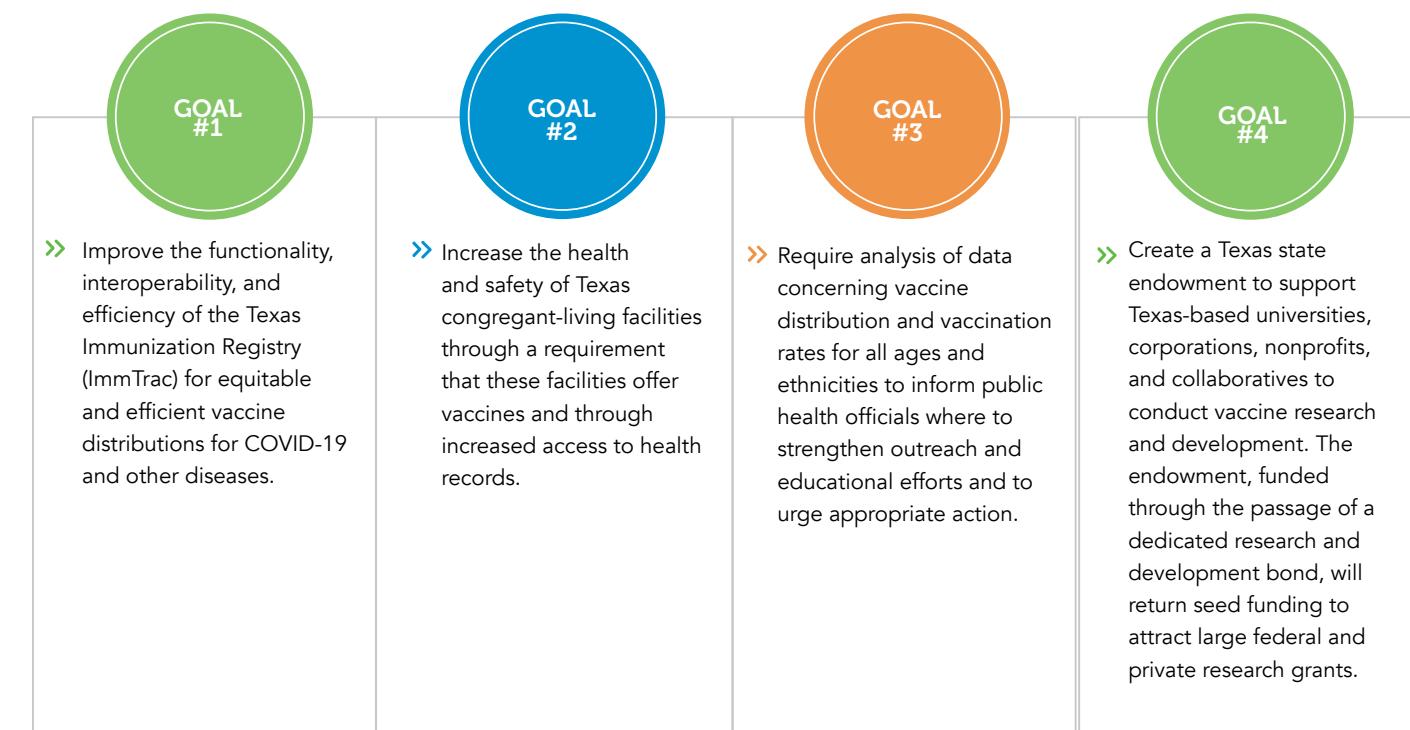

The page also contains links to our vaccine animated video series, TIP's COVID-19 Facts & FAQs, and our VAXX to the Future podcast where we address issues related to COVID-19 and its vaccines.

ADVOCACY HIGHLIGHTS

Legislative Initiatives

The COVID-19 pandemic exposed the gaps and vulnerabilities in our public health system and crippled Texas business. The Immunization Partnership Legislative Agenda for the 87th Texas Legislature had four goals we believed would help restore Texas from the ravages of the pandemic by protecting Texans and the Texas economy by closing the gaps for vaccine-preventable diseases.

TIP President and CEO, Allison Winnike, presented testimony before three legislative committees in March and one in April.

TIP Director of Advocacy and Public Policy, Rekha Lakshmanan, also testified against the Senate bill that would have repealed current vaccination requirements and prevented future vaccine requirements, thereby undoing decades of public health advancement, and leading to more vaccine-preventable outbreaks.

Despite the challenging legislative environment, TIP successfully passed two laws: Senate Bill 1353, which requires the state health department to report vaccine access and distribution data during public health disasters, and Senate Bill 239, which ensures the Texas Department of State Health Services clearly communicates immunization information to community-based organizations during times of disaster.

By the end of the regular session, TIP made more than 250 visits to legislative staff offices, educating lawmakers and staff about the importance of vaccination, which led to the passage of those two pro-vaccination bills and to the defeat 13 anti-vaccine bills.

Rekha, who also is a contributing expert with Rice University Baker Institute for Public Policy, co-authored and published a white paper examining whether vaccine legislation in Texas became partisan over the past 10 years.

Gov. Greg Abbott called legislators back to Austin for three special sessions over the summer. Lawmakers filed more than 45 anti-vaccine bills during those special sessions. None of these harmful bills passed in either chamber, thanks to TIP and our partners and advocates across the state.

Anti-vaccination bills filed during the 3rd special session ranged from preventing employers, including healthcare systems, from setting their own health and safety vaccination policies, to Senate Bill 51, which prohibited schools and universities from setting COVID-19 vaccine school entry requirements. Hill Powell, our Interim Executive Director testified against that bill, along with many individuals and representatives of business and healthcare entities.

TIP teams with Rice University science policy program during 87th Legislature

The Academy of Medicine, Engineering & Science of Texas (TAMEST) partnered with Rice University's Baker Institute for Public Policy to test a pilot program of science policy fellows. Although the COVID-19 pandemic prevented the fellows from pairing with individual legislative offices, they embedded with The Immunization Partnership capitol representatives for the session.

Virtual Advocacy Workshop

In preparation for the 87th Texas Legislature, we conducted Advocacy School: Turning Ideas into Reality. Community Health Choice provided funding for the three-day online event. We had 177 individuals register and the workshop averaged 99 attendees a day.

The workshop featured a conversation between Rekha Lakshmanan, TIP Director of Public Policy and Advocacy and Peter Hotez, MD, PhD, TIP Scientific Advisory Council member and Dean of the National School of Tropical Medicine and Professor of Pediatrics and Molecular Virology & Microbiology at Baylor College of Medicine.

We also had an exclusive conversation between The Honorable Joe Straus, former Speaker of Texas House of Representatives, and Umair Shah, MD, former Executive Director and Local Health Authority for Harris County Public Health, about the challenges of moving legislation through the Texas Legislature.

Other speakers included TIP CEO Allison Winnike; Jason Sabo, Founder of Frontera Strategy; Kirstin R.W. Matthews, PhD,

a fellow in science and technology policy at Rice University's Baker Institute for Public Policy; Jamie Fetner Ford, Deputy National Organizing Director for Moms Demand Action for Gun Sense in America; Gary Noesner, a retired FBI investigator, instructor, and hostage negotiator; Lori McClung, CEO of Advocacy and Communication Solutions; Jinny Suh, Immunize Texas Lead; and Melody Tan, a PhD candidate in bioengineering at Rice University.

Immunize Texas

Immunize Texas (IZT) organized the Immunization Virtual Rally Day on March 25 during the regular session of the Legislature. State Sen. Judith Zaffirini (D-Laredo) and State Rep. Donna Howard (D-Austin) were among the speakers along with remarks from State Sen. Kel Seliger (R-Amarillo). About 120 vaccine advocates from across Texas joined online. The success of that virtual rally, and the growing influence of the vaccine opponents in Texas and across the country proves that, now more than ever, Texas needs positive voices for immunization.

IZT conducted seven virtual meetings with legislative staff. Additionally, Immunize Texas supporters testified at three different bill hearings and helped to prevent two anti-vaccine bills from moving forward. The organization's advocacy work added five active supporters and involved about a dozen supporters for virtual meetings or testimony on bills.

IZT held meet-and-greet sessions in Houston, Laredo, McAllen, and Brownsville and met with legislative staff members in each city. This was a new way to connect with existing supporters and identify potential new supporters while also strengthening its relationships with local district offices.

The organization also made presentations on immunization advocacy to the Immunization Collaboration of Tarrant County and the Vaccine Advocacy Conference held by The Immunization Partnership.

In the Fall 2021, IZT took its next steps toward growth and became an independent network. The Immunization Partnership helped establish the grassroots organization in 2016. Under the leadership of founder Jinny Suh, IZT created a way for community advocates to speak out to Texas lawmakers about vaccinations. We look forward to working with Immunize Texas as a partner in improving immunization policies in Texas.

EDUCATION OUTREACH

Immunization University

The Immunization Partnership launched Immunization University (IZU) in June 2021. IZU is an online platform of educational courses, which included information about immunizations, vaccine-preventable diseases, and disease prevention.

The idea for a centralized online platform came after the success of TIP's online School Nurses Forum, which was active from June 2020 – July 2021. The online forum had 733 individuals register for courses and awarded 437 continuing education certificates. Registrants viewed our YouTube training video more than 1,790 times.

This year our partnership with Cizik School of Nursing at UTHealth provides continuing education credits for three courses and nine courses for individuals in other professions, students, and community members.

In the three months following the launch, 146 individuals completed the three continuing education courses and 63 individuals completed the nine community courses.

Building Coalitions Across Texas works through the pandemic

The Building Coalitions Across Texas (BCaT) program worked with several immunization coalitions to provide technical assistance and resources. The COVID-19 pandemic created many challenges for immunization coalitions, including a refocus of all their activities to COVID-19 contact tracing and providing vaccinations and vaccine education to their communities.

During FY21, we provided ongoing conversations for the immunization coalitions through 13 monthly discussion postings. Our staff attended five virtual coalition meetings and provided more than 350 contact points to share updates and resources.

Through TIP, Your Shot Texas provided funding to South Plains Immunization Network (SPIN) in Lubbock and Immunization Collaboration of Tarrant County for their COVID-19 outreach and vaccination efforts. Your Shot Texas is a statewide philanthropic partnership with Episcopal Health Foundation, Methodist Healthcare Ministries of South Texas, and the Meadows Foundation. SPIN immunized 31 individuals attending its Juneteenth event and provided educational information to 205 other attendees. Immunization Collaboration of Tarrant County hired educators to provide basic COVID-19 education to help increase administration of the vaccine during the annual Back to School immunization events in August and September, resulting in the immunization of 2,112 Tarrant County residents.

National Association of School Nurses Annual Conference

Katy Gore, our Coalitions and Education Program Manager, spoke on *Vaccine Hesitancy and the School Nurse's Role to Alleviate Parents Concerns*. The video of her presentation to the National Association of School Nurses Annual Conference received more than 1,120 views. Her presentation shows vaccine hesitancy is individual, complex, and covers a spectrum of individual beliefs and concerns.

Webinars

The Immunization Partnership, American Academy of Pediatrics, Texas Pediatric Society, and Texas School Nurse Organization held a webinar on July 14, 2021, to provide education and resources for school administrators on the impact of the COVID-19 pandemic on immunization rates among school-aged children.

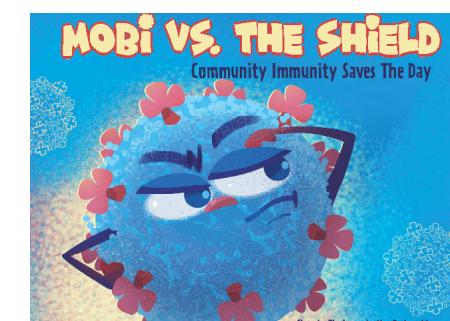

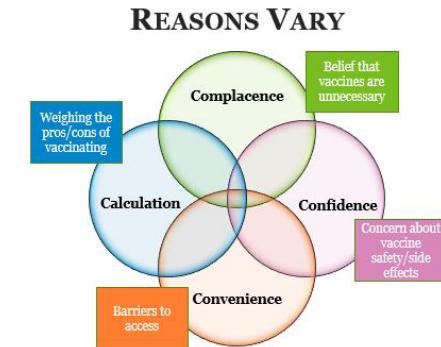

Experts discussed immunizations, the critical role they play in protecting children from preventable diseases, and how school administrators can use this information to make schools healthier and safer. Forty percent of parents and legal guardians say the COVID-19 pandemic resulted in their children missing vaccinations during the 2020-2021 school year.

Mobi vs The Shield goes nationwide

We introduced our *Mobi vs. The Shield: Community Immunity Saves The Day* in FY20. Our staff wrote this delightful children's book beautifully illustrated by Leslie Harrington (illustrator of Goofus & Gallant for Highlights magazine). The book follows Mobi, the measles virus, and Victor, the measles virus vaccine. Mobi and Victor travel around Townsville as Mobi quickly learns about community immunity and how it protects the people of Townsville.

In FY21, we distributed more than 600 books nationally to about 150 partners. In April, Amerigroup purchased 220 English and 150 Spanish copies for distribution at their community events. Both the English and Spanish versions of the book are available for purchase in either hardcover or paperback from Bookbaby.com.

This book would not have been possible without the generosity of Ronald McDonald House Charities and Peter Hotez, MD, PhD; Community Health Choice; and the Rotary Club of Houston.

RESEARCH HIGHLIGHTS

Regional Dashboards

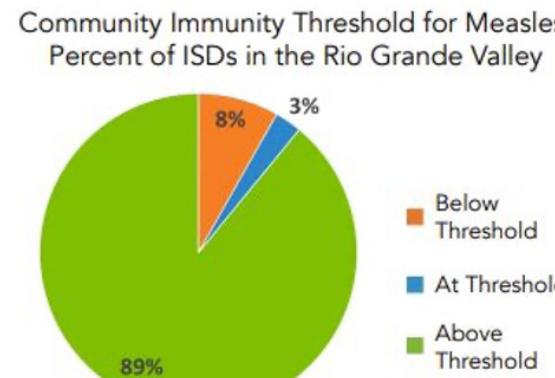

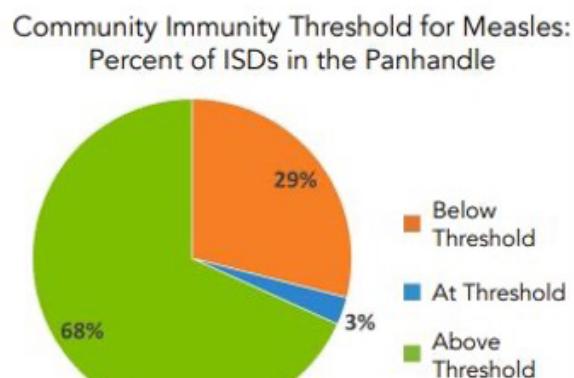

The Immunization Partnership published our Regional Dashboards, or health reports, for Texas parents, educators, public health workers, and state and local policy makers. They highlight key immunization data points for each of the eight Texas geographic regions and feature resident opinions on vaccine-related issues. Data points include non-medical exemption rates and five-year trends for school-required vaccines, seasonal deaths from flu and pneumonia, and immunity thresholds for each region's public school districts.

The regional information came from:

- Texas Influenza Surveillance Summer Report 2019-2020 Season / 2020 MMW- Week 32;
- Texas Department of State Health Services, Conscientious Exemptions Data – Vaccination Coverage; and
- Texas Department of State Health Services: Annual Report of Immunization Status of Students, 2019-2020.

Information on the number of deaths in Texas from pneumonia and influenza (P&I) was among the data in the report. During 2019-2020, we had 10,047 Texans die from P&I, which underscores the importance of these vaccines.

The data also reveal the disturbingly high percentage of Texas public school districts—between 8% and 29%—that fall below the 95% community immunity threshold for measles. Only 89% of school districts in the Rio Grande Valley region were above the threshold compared to 68% of school districts in the Panhandle region.

Annual Community Survey

The Immunization Partnership conducted our annual Community Survey in late Spring 2021. Parents and non-parents in Texas and from other states participated in the survey presented in English and Spanish. The survey received 635 responses from Texas and 792 from outside Texas.

We partnered with Statistics Without Borders to analyze participants' attitudes toward vaccinations, demographic factors, and subpopulations related to attitudes toward vaccines.

Participant attitudes about vaccines were mostly positive. Age was a significant factor; younger participants had more negative attitudes. Men also were more likely to be unsure or not to believe vaccine-preventable diseases have serious health risks.

Participants 24 and younger

Do you believe vaccines protect children from illnesses?
30% said no

Do you believe vaccine-preventable diseases have serious health risks?
32% unsure or do not believe

We saw no significant difference in responses among Asian, Black, Hispanic, and White participants. Those with a high-school degree or lower, however, were less likely to agree with community immunity protection. Participants with no college degree were more likely to be unsure or did not believe vaccine-preventable diseases have serious health risks, compared to those with at least one college degree.

COVID-19 vaccine concerns

At least one concern 58%	Long-term impacts 58%
Lack of data on vaccine recipients 41%	Speed of vaccine development 39%

HEALTH EQUITY COUNCIL FOR IMMUNIZATIONS

The Immunization Partnership established our Health Equity Council for Immunizations (HECI) during Spring 2021 to explore ways to improve vaccine education, outreach, and access in vulnerable communities affected by health disparities throughout the state. As part of that plan, HECI placed two opinion articles in Texas newspapers regarding maintaining positive attitudes during the pandemic and COVID vaccine hesitancy and misinformation.

The 19 inaugural members included:

Jonnae Olivia Atkinson
Ogi Alozie, M.D.
Allison Connally
Lisa Fuller, M.D.
Linda Fulmer

12TH ANNUAL COMMUNITY IMMUNITY LUNCHEON

We held our 12th Annual Community Immunity Luncheon: A Virtual Event on April 22, 2021. Our supporters and participants made this second virtual luncheon an overwhelming success. We raised more than \$173,000, which exceeded our goal by 14%, thanks to the dedication of luncheon co-chairs Riki Graves and Carter Dugan and the generosity of our sponsors and contributors.

Our virtual guests saw keynote speaker, Dr. Peter Hotez interviewed by political analyst Mustafa Tameez about the pause on the Johnson & Johnson vaccine, current plans to combat new COVID-19 variants, timing for vaccine boosters to create stronger protection, and the importance of community immunity.

TIP presented Amerigroup with the Ralph D. Feigin, MD Award for Excellence, in recognition of Amerigroup's commitment to achieving health and wellness for underserved communities across Texas and the rest of the country. We also presented Melanie E. Mouzoon, MD, with the John R. Boettiger, Jr. Award for Community Partnership. Dr. Mouzoon is a leader in health care and the community and devoted immunization advocate and educator. She also served four times as chair of our Board of Directors.

Prior to the virtual luncheon, attendees had the opportunity to participate in one of five, live discussions with experts in immunization, public health, research, and politics.

TRADITIONAL AND SOCIAL MEDIA HIGHLIGHTS

TIP goes global

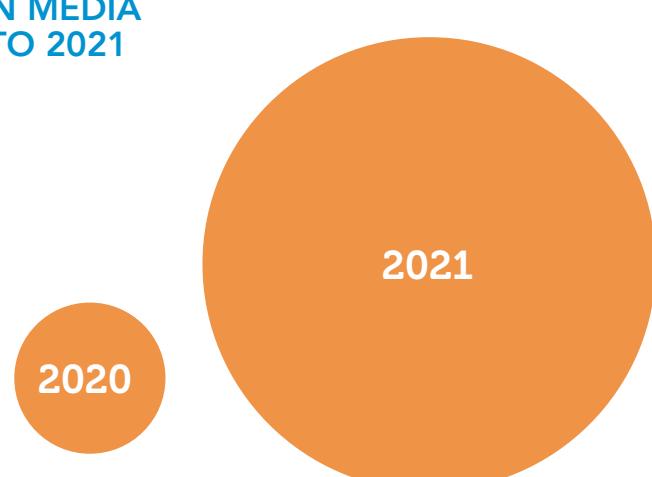

In April 2021, we introduced two podcasts carried on most podcast platforms. Vaxx Voice deals with vaccines in general; Vaxx to the Future features information specifically related to COVID-19 and its vaccines. In their first six months, Vaxx Voice received more than 240 downloads from 13 countries while Vaxx to the Future received more than 370 downloads from 17 countries. In August 2021, we inaugurated TIP News, a daily podcast digest of current vaccine-related news from Texas and around the world. The top five countries for our podcasts listeners were the United States, Germany, France, Finland, and Barbados.

Our positive immunization messages reached millions of readers, listeners, and viewers in Texas and around the world through traditional media comprising newspapers, magazines, online-only publications, radio, and television. TIP interviews, news, and opinion pieces appeared in various media 624 times during FY21, a number that includes opinion pieces carried by 80 print or online publication.

The Houston Chronicle (360,251 subscribers), Austin American-Statesman (129,519 subscribers), Dallas Morning News (143,000 subscribers), PaperCity (120,000 circulation), San Antonio Express-News (137,059 subscribers), Texas Monthly (2.5 million subscribers), Texas Tribune (5.3 million monthly online visitors), The New York Times (8 million subscribers), and USA Today (1.06 million subscribers) are among the "print" media outlets that quoted our staff, carried our news releases, or ran our opinion pieces. Other online sites, such as Yahoo News and DNYUZ, run stories from other news outlets. Yahoo News has 100 million monthly readers. DNYUZ has 830,000 online visitors.

We were on National Public Radio stations around Texas, reaching more than 20 million listeners. Television and online newscasts garnered millions of viewers. International media in Germany, New Zealand, and elsewhere also covered TIP immunization news and information.

We also are on Twitter, Facebook, LinkedIn, Instagram, and YouTube.

TIP's Twitter Verification badge

Our Twitter account (@Immunize_USA), received the blue Verification badge. Not everyone, including some of the top vaccine groups and medical facilities, receive this coveted verification.

Per Twitter: The blue Verified badge on Twitter lets people know that an account of public interest is authentic. To receive the blue badge, your account must be authentic, notable, and active. Your account must represent or otherwise be associated with a prominently recognized individual or brand, in line with the notability criteria. People who are using Twitter effectively to bring awareness, share information, and galvanize community members around a cause, to bring about socioeconomic, political, or cultural change, or to otherwise foster community, may be Verified.

Other criteria may include three or more featured references within the six months in news outlets including specialty publications related to their profession or expertise.
